Using SDK

CreatorsAPI provides SDKs for multiple programming languages to simplify integration. Each SDK handles authentication, request signing, and API communication automatically, allowing you to focus on building your application.

Before using any SDK, you need to generate credentials from Amazon Associates Central. Follow the instructions in the [Register for Creators API](#) guide to create your credentials (Client ID, Client Secret, and Version).

Available SDKs

CreatorsAPI offers SDKs for the following languages:

- **Node.js** - For JavaScript/TypeScript applications
- **Python** - For Python applications
- **PHP** - For PHP applications
- **Java** - For Java applications
